- Out of that discussion you keep adding points to your Binder
- Take your exam at any time within max 8 weeks timeframe after the end of the Course

USMLE MASTERCLASS GUARANTEE 100% SATISFACTION!

Some Students' Testimonials

"Dr. Suleiman knowledge's in area of USMLE is very good. He knows areas of high yield focus and also low yield areas where he provides enough necessary information to do well. Dr. Suleiman teaching style is good for both subject based, as well as system based. When he taught during the semester he provided the necessary information and then during Q-bank course he teaches you how to apply it. He knows how to teach in simplistic way so that you get the basic foundation as well as the big picture, which the makes the material easier to understand. The q-bank course that he teaches helps you approach the questions and how to figure them out in logical manner. Of the many teachers I have had over the years through college and medical school, he was one of the few professors that motivates and supports at the same time. I can say personally that he cares for you as student, as well as your well being. He can help a student regardless of his or her background. He provides the foundation for students who need it, as well as help improve techniques to students who do have a good background."

Student

"I came into Dr. Suleiman's Step 1 review class not passing the comp and a feeling of uncertainty when it came to my overall knowledge of material in basic sciences. Following his course I brought my comp grade up 10 points with my cardiovascular score in the 99 percentile (it was below average before). Dr. Suleiman takes the complex material of basic sciences and integrates all the subjects in such a way that it makes it easy and logical to learn. This makes studying a lot easier, it even makes what you are learning fun. Each class that is taught is full of valuable information geared toward the USMLE Step 1. If you truly want to be a Doctor sign up for this review program and Dr. Suleiman will guide and mold you into a better student, ultimately making you a better Doctor."

Student

"I got 220/94 so I'm happy I got in the 90s. I thought the test was really hard when I finished so I was pleasantly surprised. I had a lot of hematology and immunology on my test surprisingly. What you taught me throughout all your classes was EXTREMELY helpful! Thank you SO much for everything you taught me, and I hope we can continue to keep in touch. I wanted to ask you what books you recommend for step 2. Will you be doing any review on Step 2? I won't mind coming to your classes! You helped me so much for step 1."

Student

"I would like to provide some positive feedback based on the course, Saturday subject class and the Q/A USMLEWORLD Class. As a participant in all three programs I would like to say that it was very helpful in organizing my thoughts and notes in preparation for the USMLE Step 1 exam. This program helps me to prepare for my ICM shelf, my Comprehensive Exit exam and my STEP. I believe that it would reduce the time that I need to prepare for step one on my own. I would recommend this program to anyone who needs preparation for the USMLE. Thank you again for your help."

Student

"I highly recommend attending Dr. Suleiman's USMLE Step 1 prep course and practice question sessions. The lectures are well organized, and focused on the high yield material that has been on recent Step 1 exams. The lectures are presented in a systems-based fashion, using First Aid for the USMLE Step 1 book as a guide. With this, he integrates information he finds in every other review book available, what he has seen on practice Step 1 questions and feedback from students who recently sat for Step 1. The afternoon practice question sessions really help to solidify

USMLE MASTERCLASS GUARANTEE 100% SATISFACTION!

the information obtained from the lectures, as well as to practice test-taking skills and apply what you have been learning. He teaches you how to focus on the pertinent information in questions, and how to rule out distracting answer options. Not only do I better understand the concepts, Dr. Suleiman has also helped me predict the possible ways the concepts can be tested. I feel much more prepared for Step 1, and would encourage anyone to enroll in his program."

Student

"I attended Dr. Suleiman's USMLE Prep Course Lectures as well as his USMLE Review Question and Answer Sessions. Dr. Suleiman teaches using an integrative system-based approach and the question and answer sessions in the evening really help to solidify the information gathered during the morning lectures. Most importantly, Dr. Suleiman teaches his students how to identify the information considered important by the USMLE. He also demonstrates test taking strategies that help the student quickly consider the most common presentations or scenarios for each available answer option. This strategy greatly increased my confidence during mock exams and practice question sessions. I am truly thankful for the personalized medical education that I received from Dr. Suleiman; I would recommend this course to any student who wants to maximize his USMLE performance."

Student

"I passed step 1 99 %. As for students that are in the 5th semester, I knew that integration of material was key however you made me much better at it and you tied many more concepts together for me. I think the students in 5th semester must master the material provided in First Aid along with your additional notes and concepts and drawings."

AUA student

"I passed both ICM and COMP, thanks to you! I sincerely thank you so very much from the bottom of my heart you're a wonderful teacher and great mentor and I look up to you greatly."

Student

"I recently took a Review Course along with a USMLE World Course with Dr. Suleiman. It really helps me to focus in the relevant material for studying for my board exam. I would recommend this course to any student who is thinking of taking other review courses. It would be a great investment to take this course because it is worth it and way cheaper if you are on a budget. These courses really help me to organize my time and how I study. Dr. Suleiman will not tell you anything less than other famous review courses. He will by all means, probably tell you more. He will get to know you as a student because he interacts with each student by asking questions making sure that everyone understands. Take his course you will not regret it. It's really awesome. MB"

Student

"Dr Suleiman, an expert in USMLE preparation, not only brings his past Surgery Knowledge, but also his Step cracking abilities to his course. He teaches you how to think the way the Test writers do so that it helps and allows you to correctly guess how the question and even specific details will be asked on test day so that there are no surprises. He compiles information from popular sources and relays the most relevant and testable points from each topic in an organized fashion. Many questions that helped me achieve a 226/97 on USMLE Step 1 were only found in the notes I took from his class. He helps you achieve your true potential with combined efforts and his highly positive motivation, reinforcement and encouragement."
